Conner Robosan

The reason I choose to peruse ISE comes from a class I took my freshman year in an ENG 1000 level class. In this class we were introduced to many different fields of engineering. In this class I met a couple senior students who were ISE students and took an idea they had from their freshman year and created an actual product that they could sell to a company. That’s when I realized that engineering I wasn’t interested in just one field of engineering or other industries. I wanted a major and career that would allow me to go in many directions from the auto industry or health industry. ISE allows me to follow many interests I have and be successful at them.

I am a part of IIE because of the other people involved and the people you meet when you are involved. Trust me when I said that college has been light and day difference over the last few years. One of the reasons I am in a better place now is this organization. It has helped me open up and want to strive to be better in school and as a person.

After I graduate within the next two years I want to get a career in the field of Industrial Engineering in no specific industry. I would prefer to stay in Michigan close to my family but would not mind moving for work.

Interesting Facts about me

- I have been playing soccer since I was 5 years old.
- I enjoy traveling and camping. One of my life goals is to see all the United States. I already have seen half of them to date.
