Apply: Your future starts today!

Admission Requirements

The BSCT degree program is designed to admit students with an associate degree in an appropriate engineering technology discipline, an associate degree in engineering science, or college-level course work equivalent to an associate degree in engineering/technology related area. A minimum grade point average of 2.50 is required for admission into the program. Students with a 2.00 to 2.50 grade point average may be admitted as pre-engineering technology students, and may be transferred into the engineering technology program upon successful completion of certain coursework outlined by an engineering technology advisor. To apply for admission, contact the Office of University Admissions at (313) 577-3577.

The computer technology program prepares students by focusing on the skills and knowledge necessary to adapt new science to new products. The degree is an interdisciplinary program of study that combines professional courses in computer science, information systems, electronics and engineering technology. The strengths of the program include hands-on curriculum, hardware oriented laboratories, scientific advancement merged with applications, and skills for the enhanced job market!

Bachelors of Science in Computer Technology:

Computers are a crucial part of our society. They allow businesses to function and grow and reach into almost every sector of every industry.

This degree gives graduates many options for employment such as:

• Large organizations, for example banks, retail chains, utilities and more.
• Local, state and federal government
• Computer companies and vendors
• Research Labs and institutions.

With so many doors opened with this degree, you can feel confident to choose this program.

Benefits:

Students in the Computer Technology Program enjoy the benefits of attending the Wayne State University, an institution renowned for its excellence in instruction especially in the science and technology areas as well as:

• Small college feeling in the Division of Engineering Technology.
• Instruction by full-time faculty members.
• Quality Academic Advising, and access to student services such as Career Services.
• ETSO, Engineering Technology Student Organization gives students an opportunity to develop friendships and professional skills.
• Use of campus resources, libraries, and student fitness center.
